REPORT #A09A4E7F REVISION 1 APP v1.0.0-beta.3

5 of 10	1	6
Checks completed	Items to review	Not fully assessed

Specification differences to check

Difference to check

Seller-claimed installed memory

Listing: **16 GB** · Report: **8.00 GB**

The installed-memory values differ after unit conversion (16,000,000,000 vs 8,000,000,000 bytes). Check GB/GiB units and ask the seller to explain the configuration.

Inspection findings

Recorded evidence

Device profile

✓ Observed

Collected the information available without permission. Missing exact specifications remain unknown; this profile is not a hardware-health pass.

▼ 11 recorded observations

Operating system Reported family only; browser information may be reduced or generalized.	**Windows**	Browser-reported
Browser Reported family only; privacy settings may change this information.	**Chrome**	Browser-reported

Suggested device type A convenience suggestion; you can correct this in setup.	**computer**	Browser-reported
Secure browser context	**true**	Browser-reported
Reported touch points Capability hint; this is not a tested simultaneous-touch count.	**10**	Browser-reported
Available logical processors The browser may limit this hint. This is not a physical-core count or exact CPU model.	**16**	Browser-reported
Approximate browser memory hint A coarse, privacy-limited hint; this is not installed RAM and is not used for listing comparisons.	**32 GiB**	Browser-reported
Display size in CSS pixels CSS screen dimensions, not native physical panel resolution.	**1920 × 1080**	Browser-reported
Browser viewport Only the page area available to this browser.	**1440 × 1000**	Browser-reported
Device pixel ratio	**1**	Browser-reported
Browser graphics renderer May be masked, generalized, or software-backed. This does not independently identify the installed GPU.	**ANGLE (Google, Vulkan 1.3.0 (SwiftShader Device (Subzero) (0x0000C0DE)), SwiftShader driver)**	Browser-reported

completed · Test v1.0.0 · 10/14/2026, 9:40:26 PM

Processing sample

✓ Observed

The fixed browser workload completed and its checksum matched. This measures this session only; background load and power settings affect timing.

▼ 9 recorded observations

Verified computation iterations	**33554432**	Measured
Active computation duration	**92.3 ms**	Measured
Browser processing sample Millions of xorshift32 iterations per second in this session. No cross-device score or hardware-health judgement.	**363.54 million iterations/s**	Measured
Verified checksum	**934658367**	Measured

Warmup policy	**One unmeasured block of 131072 iterations; one worker**	Measured
Tab visibility during sample	**visible**	Measured
Browser Reported family only; privacy settings may change this information.	**Chrome**	Browser-reported
Available logical processors The browser may limit this hint. This is not a physical-core count or exact CPU model.	**16**	Browser-reported
Approximate browser memory hint A coarse, privacy-limited hint; this is not installed RAM and is not used for listing comparisons.	**32 GiB**	Browser-reported

completed · Test vxorshift32-v1 · 10/14/2026, 9:40:27 PM

Graphics rendering

✓ Observed

A real WebGL scene rendered and its read-back pixel matched the known color. This is a small rendering check, not a full GPU stress test.

▼ 4 recorded observations

Verified graphics scene	**WebGL 1 · 256 × 144 · solid-color triangle**	Measured
Read-back pixel (RGBA)	**64, 128, 191, 255**	Measured
Frames drawn	**30**	Measured
Median browser frame interval Browser scheduling behavior, not a certified panel refresh rate.	**16.7 ms**	Measured

completed · Test v1.0.0 · 10/14/2026, 9:40:27 PM

Keyboard

✓ You confirmed

Keyboard events were received inside the focused test area. System shortcuts, firmware keys and Fn behavior are not fully testable in a web page.

▼ 11 recorded observations

Selected layout	**ansi**	User-provided
Distinct physical key codes received	**3**	Measured

Distinct key values without physical codes These events do not identify a physical key position.	**0**	Measured
Key codes with a release event	**2**	Measured
Keys held at the last observation	**0**	Measured
Focus interruptions	**1**	Measured
Expected ANSI keys not yet received Unpressed or operating-system-intercepted keys are untested, not broken.	**75**	Measured
KeyA	**1 press; release received**	Measured
KeyB	**1 press; release received**	Measured
Escape	**1 press; release not received**	Measured
Your assessment	**Looks / sounds right**	You confirmed

completed · Test v1.0.1 · 10/14/2026, 9:40:29 PM

Mouse & trackpad

• Not checked

This check has not been run. Its condition remains unknown.

Touchscreen

• Not checked

This check has not been run. Its condition remains unknown.

Camera

• Not checked

This check has not been run. Its condition remains unknown.

Microphone

• Not checked

This check has not been run. Its condition remains unknown.

Speakers

• Not checked

This check has not been run. Its condition remains unknown.

Display

✓ You confirmed

The app rendered static test patterns. Only your visual answer can assess persistent dots, discoloration, image retention or unevenness.

▼ 4 recorded observations

Static patterns shown Rendering a pattern does not automatically detect panel defects.	**Red, Blue**	Measured
Different patterns shown	**2**	Measured
Fullscreen was used Fullscreen is optional; browser support varies.	**false**	Measured
Your assessment	**Looks / sounds right**	You confirmed

completed · Test v1.0.0 · 10/14/2026, 9:40:30 PM · 2 attempts retained

Physical storage capacity and battery wear: not checked. Browser hints are qualified observations.

Seller claim comparison

Difference to check

Seller-claimed installed memory

Listing: **16 GB** · Report: **8.00 GB**

The installed-memory values differ after unit conversion (16,000,000,000 vs 8,000,000,000 bytes). Check GB/GiB units and ask the seller to explain the configuration.

What this report means

- A browser inspection cannot guarantee a healthy device or reveal every defect.
- Exact hardware specifications are unknown unless imported or provided by you. Imported reports are not independent verification.
- Battery wear, internal storage health, ownership, locks, and functions outside this browser were not checked.
- Performance describes this browser session. Camera and microphone recordings are not included in this report.

Recorded client time and device information are not proof of authenticity. This is an inspection record, not a device certification.
